Based in India · Open to remote and relocation (USA · EU · UK · Gulf).

Engineering Lead and hands-on software engineer with 5+ years building AI platforms, evaluation systems, and production automation. Technical lead for teams of up to **20 engineers**; improved NVIDIA program acceptance **from 40% to 95%**, automated approximately **90% of manual technical QA**, and reduced LLM inference costs by **50%**. Specializes in Python/TypeScript systems, multi-tenant architecture, AI evaluation, production reliability, and 0-to-1 platform delivery.

EXPERIENCE

Engineering Lead · AI Platforms & Data Jul 2026 - Present

Agents Only Technologies (part of TP) · Contract · Remote

Lead architecture, full-stack delivery, and operational scaling for AI evaluation and enterprise media data programs supporting NVIDIA, ByteDance, and Google.

- **Acceptance and automation.** Raised NVIDIA program acceptance **from 40% to 95% (+55 percentage points)** and eliminated approximately **90% of manual technical checks** through configurable validation of formats, codecs, resolution, frame rate, audio quality, exposure and sharpness.
- **Reusable media operations.** Unified contributor onboarding, resumable uploads, processing, QA and delivery in **MediaHub** for TTS and Egoverse programs; supported **10,000+ contributors across 2026 programs** and intercepted **195 non-compliant submissions** before delivery in September through configurable rules and SLA-based review queues.
- **Operational reliability.** Introduced background validation jobs, preview retries, queue monitoring, Sentry observability, and recovery controls, maintaining **~99.98% server-error-free production API execution** in September 2026.
- **Controlled AI evaluation.** Built five-model comparison and GMR, medical, coding, and STEM assessment workflows in **AI Arena**, supporting **6,000+ candidates across 2026 assessments** with qualification scoring, access controls, progress tracking, and reporting. Established golden-dataset and structured-scoring foundations for medical reasoning evaluations.
- **Architecture and engineering standards.** Planned the Cloudflare R2-to-AWS S3 migration with checksum reconciliation, least-privilege access and rollback controls. Established ownership across application and cloud engineering, with release gates, regression testing and architecture reviews; separated production traffic from performance testing.

Tech Lead · Senior Full Stack AI Engineer Nov 2025 - Sep 2026

TheAgentic AI · Contract · Applied AI Research, California · Remote

Led enterprise AI architecture and delivery with a small forward-deployed team, translating client requirements into reusable platform capabilities.

- **Platform delivery.** Enabled **10 enterprise client platforms in 8 months** through a reusable multi-tenant agentic orchestration engine with tenant-isolated data, configurable workflows and shared platform primitives.
- **Prometheus RCA / Enterprise RCA.** Unified GitHub, Grafana, Prometheus, CloudWatch, Slack, Jira, and Notion with alerts, metrics, logs, traces, deployments, topology, and runbook context for evidence-backed incident investigation and postmortem generation.
- **Investigation controls.** Added engineer clarification, service inference, workspace isolation, encrypted credentials, OAuth, sensitive-data redaction, and configurable publishing controls. Python, FastAPI, LangGraph, OpenAI, PostgreSQL, React and TypeScript.
- **Privacy-aware matching.** Combined voice transcription, moderation, human review and structured extraction with pgvector retrieval and LightGBM ranking to match support seekers with mentors; supported enterprise and university pilots.
- **Auditable compliance workflows.** Combined deterministic SQL with LLM orchestration to ground regulatory responses in traceable CFR/FDA data; translated enterprise security and compliance requirements through stakeholder architecture reviews.
- **Open-source orchestration.** Contributed multi-agent task planning and execution APIs to CortexON, TheAgentic's generalized AI agent.

Senior Full Stack AI Engineer · Tech Lead Mar 2025 - Nov 2025

Dumroo.ai · AI EdTech, New Jersey · Remote · **Promoted to Senior in 6 months** (from Full Stack AI Engineer)

- **Technical lead for a 20-engineer team**, reporting to the CEO; owned architecture, hiring, developer training, and roadmap execution.
- Launched **Dumroo 2.0 in 4 weeks**, an AI learning and assessment platform; supported adoption across **6 US districts and 10+ schools in 6 months** through RBAC and automated onboarding.
- **Inference efficiency**. Cut LLM inference costs **50%** through a hybrid architecture combining RAG, conventional application logic and caching to reduce unnecessary model calls.
- **Operational automation**. Built an internal platform that automated approximately **90% of manual setup and onboarding work**; established regression testing, evaluation pipelines and CI/CD for releases.
- **AI quality**. Improved response accuracy through RAG, adversarial testing, failure-case analysis, prompt refinement and model-parameter tuning.

Head of AI & Engineering Apr 2024 - Feb 2025

CodeSpaze · Software, Web & AI Development Services · Remote

- Drove **3x monthly recurring revenue growth** through reusable ML templates and full-stack AI services.
- Technical lead for a **20-engineer team**; established CI/CD, automated testing and developer onboarding, and mentored engineers across AI, backend and frontend delivery.
- Built reusable AI/full-stack frameworks and production LLM/NLP services, reducing delivery overhead.

Software Engineer & Data Analyst Jul 2023 - Apr 2024

Techpile Technology Pvt. Ltd. · Client Software Delivery · Lucknow, India · On-site

- Reduced SQL query latency **40%** through .NET Core API and schema optimization, improving dashboard performance.
- Delivered client web systems and reusable frontend components supporting project renewals and services revenue.

Machine Learning Engineer · Data Engineering Lead Mar 2023 - Jul 2023

Omdena · Project-based engagement · Remote

- Completed a **100K+ image healthcare dataset in 3 weeks** through confidence-based pre-annotation and active learning, accelerating the project timeline **30%**.
- Coordinated data engineering work across a **60+ member global project team in 15 countries** and delivered YOLOv8/PyTorch computer vision pipelines ahead of schedule.

Software Engineer Jul 2021 - Feb 2023

CodeSpaze · Software, Web & AI Development Services · Remote

- Delivered **8+ client applications** on **2 to 3 week** cycles; reduced setup and delivery time approximately **30%** through reusable components and tooling.

SELECTED PROJECTS

OpenFishh Apache 2.0 · OSS openfishh.com github.com/MohdTalib0/OpenFishh

Open-source multi-agent research platform that gathers public sources, tracks claims and confidence, handles contradictions and generates auditable reports with evidence provenance and knowledge graphs.

Python · FastAPI · React · SQLite · Docker · Multi-Agent Orchestration

SKILLS & TOOLS

AI Platforms & Infrastructure: Agent Orchestration, Multi-Agent Systems, AI Evaluation, LLM Observability, Model Routing, Tool Calling, RAG, Memory Systems, Provenance, Agent Reliability, LangGraph, pgvector

Backend & Platform Engineering: Python, FastAPI, PostgreSQL, Redis, TypeScript, React / Next.js, REST APIs, Multi-Tenant Architecture, Background Jobs, Queues

ML & Data Systems: PyTorch, XGBoost, LightGBM, YOLOv8, SQLAlchemy, Alembic, Media QA Pipelines

Cloud & Reliability: AWS, S3, Docker, GitHub Actions, CI/CD, Sentry, Cloudflare R2, Observability

Technical Leadership: Architecture Reviews, Hiring, Mentoring, Roadmap Ownership, Technical Writing, Enterprise Delivery, 0-to-1 Platforms

EDUCATION

Indian Institute of Technology Kharagpur (IIT Kharagpur) 2026 - 2027 · In progress

Executive Programme in Technology & AI Leadership · Partha Ghosh School of Leadership

B.Tech, Computer Science & Engineering 2019 - 2023

Sagar Institute of Technology & Management, Barabanki, India

RECOGNITION & AWARDS

2023 **Top 10, Data Science Hackathon** · at Innomatics Research Labs

2023 **Best Performer, Software Developer** · at Techpile Technology
