

# MOHD TALIB

AI Engineering Lead · Full-Stack

✉ [mohammad.talib319@gmail.com](mailto:mohammad.talib319@gmail.com) · 🌐 [Portfolio](#) · 🐙 [github.com/MohdTalib0](https://github.com/MohdTalib0) · 🔗 [linkedin.com/in/mohdtalib](https://linkedin.com/in/mohdtalib)

## EXPERIENCE

### TheAgentic AI

Nov 2025 - Present

*Tech Lead · Senior Full Stack AI Engineer*

*Applied AI Research, California · Remote*

- Built the core multi-tenant agentic engine (now the OpenFishh OSS framework) that let the team ship 10 enterprise platforms for 10 clients in 8 months, with strict tenant isolation.
- Replaced black-box RAG with auditable deterministic SQL + LLM orchestration, and built a safety-gated peer-support voice matching engine (pgvector ANN + LightGBM lambdarank) that self-retrains at near-zero inference cost.

### Dumroo.ai

Mar 2025 - Nov 2025

*Tech Lead*

*AI EdTech, New Jersey · Remote*

- As de facto CTO (reporting to CEO), led a 20-engineer team to build Dumroo 2.0 from scratch in 4 weeks and take it to production, with 10+ districts in the pipeline.
- Owned the core AI architecture: semantic vector caching and LLM routing (50% cost cut, 2x accuracy) and RBAC onboarding pipelines (10x faster setup). Promoted to Senior in 6 months.

### CodeSpaze

Apr 2024 - Feb 2025

*Head of AI & Engineering (returned to lead)*

*Software, Web & AI Development · Remote*

- Led a 20-person team to 3x MRR growth by standardizing ML templates and scaling developer onboarding to a pipeline of 10,000+ candidates.

### Techpile Technology

Jul 2023 - Apr 2024

*Software Engineer & Data Analyst*

*Lucknow, India · On-site*

- Built high-volume .NET Core APIs and tuned SQL schemas (40% lower query latency); owned client delivery from build to handoff, winning renewals and new revenue.

### Omdena

Mar 2023 - Jul 2023

*Machine Learning Engineer to Data Engineering Lead (Contract)*

*Global AI for Social Good, New York · Remote*

- Led data engineering across a 60+ engineer, 15-country team, building a semi-automated active-learning annotation pipeline that cleared 100K+ images in 3 weeks and shipped the YOLOv8 system ahead of schedule.

### CodeSpaze

Jul 2021 - Feb 2023

*Software Engineer*

*Software, Web & AI Development · Remote*

- Shipped 8+ client applications on 2 to 3 week cycles, cutting setup time 30% with reusable component libraries.

## SELECTED PROJECTS

### OpenFishh | Python, FastAPI, PostgreSQL, pgvector, OpenAI, LangChain

🌐 [Live](#) · 🐙 [Code](#)

- Open-source agent infrastructure: persistent memory, provenance, agent orchestration, and reliable multi-agent execution. Apache 2.0, 17 stars.

### TalPred AI | XGBoost, PostgreSQL, Redis, MLflow, React

🐙 [Code](#)

- Production-grade equity alpha system: automated daily cross-sectional predictions, paper trading, monitoring, and signal-decay tracking with calibrated backtesting.

## TECHNICAL SKILLS

**AI Systems:** Agent Orchestration, Agent Memory, Multi-Agent Systems, AI Reliability, RAG, Tool Calling, LLM Evaluation, LangChain, OpenAI & Anthropic APIs

**Full-Stack Engineering:** Next.js, React, TypeScript, FastAPI, Python, Node.js, PostgreSQL, pgvector, Redis

**Infrastructure:** Docker, CI/CD, GitHub Actions, AWS, Vercel, observability, async architectures, REST API design

**Leadership & Process:** Technical Leadership, Agile/Scrum, Sprint Planning, Hiring & Mentoring, Code Review, System Design, Stakeholder Management

## EDUCATION

### Sagar Institute of Technology & Management

2019 - 2023

*B.Tech, Computer Science & Engineering*

*Barabanki, India*
