EXPERIENCE

Senior Full Stack AI Engineer · Technical Lead

Nov 2025 – Present

TheAgentic AI | Applied AI Research Company, California

Remote

- Sole technical lead across **3 production platforms**, each shipped 0-to-1 (frontend + backend + infra) in 2–4 weeks with full client sign-off.
- Solunar (Health-Tech)**: Built async pipeline for vision + LLM-based tongue analysis, enabling automated metabolic insight generation from medical images. Designed multi-tenant APIs and analytics layer on **FastAPI + PostgreSQL + async SQLAlchemy**.
- H2M (Reg-Tech)**: Replaced black-box RAG with **deterministic SQL + LLM tool-use orchestration**, making compliance workflows auditable and reducing manual regulatory review effort. Full-stack: Next.js + FastAPI, ingesting CFR/FDA data into structured schemas.
- Boxsy.io**: Rewrote failing production platform end-to-end, eliminating critical failures and restoring stability within 2 weeks. Restructured codebase for long-term maintainability.

Senior Full Stack AI Engineer · Tech Lead

Mar 2025 – Nov 2025

Dumroo.ai | AI-Powered EdTech, New Jersey

Remote

- Owned full technical org: **hired engineers, conducted interviews**, ran sprint planning, delivered KTs, coordinated with US school administrators.
- Built **Dumroo 2.0 from scratch in 4 weeks**, an AI-driven learning & assessment platform for K-12 schools. Stack: Next.js, TypeScript, Supabase, Vercel, GitHub Actions.
- Designed **RAG pipelines + agentic AI workflows**, improving insight accuracy by **2×** and reducing inference costs by **50%** via prompt optimization and caching.
- Designed AI-powered Analytics and Personalized Learning engines, driving inbound interest from **10+ school districts** and onboarding **3+ schools**.
- Automated onboarding, achieving **10× reduction** in school setup time. Promoted to Senior within 6 months.

Blockchain & Generative AI Engineer

Jan 2025 – Mar 2025

Lokachakra | Decentralized Social Platform, London

Remote

- Built Web3 social platform on **Sui/Aptos blockchain** with zkAuth identity, OpenAI-powered content moderation, and real-time encrypted streaming chat.

Head of AI & Engineering

Apr 2024 – Dec 2024

CodeSpaze | AI Education & Products, Lucknow

Remote

- Led **20-member cross-functional team**. Drove **10× growth** to 10K+ applicants. Deployed production AI systems using LLMs, Hugging Face, and custom NLP pipelines. Mentored engineers in ML and full-stack development.

Software Engineer & Data Analyst

Jul 2023 – Apr 2024

Techpile Technology Pvt. Ltd., Lucknow

On-site

- Built .NET APIs, data pipelines, and SQL dashboards for analytics. Automated data validation and preprocessing. Awarded **"Best Performer: Software Developer"** (2023).

Machine Learning Engineer

Mar 2023 – Jul 2023

Omdena | Global AI for Social Good, New York

Remote

- Led **60+ AI engineers across 15+ countries** as Data Engineering Lead. Built YOLOv8 + PyTorch pipelines on **100K+ images** for healthcare diagnostics and infrastructure monitoring.

Data Science & ML Engineering | Multiple Roles

Jul 2022 – Jun 2023

Innomatics Research Labs · CodeClause · The Sparks Foundation · Shiga Corp · Robust Results · Techpile

- Built CNN & YOLO models for plant disease detection, TensorFlow neural networks for forecasting systems, Flask web apps with embedded ML pipelines, and Java backend services. Led engineering team at Innomatics. **Top 10, Data Science Hackathon (2023)**.

TECHNICAL SKILLS

AI & LLM Systems: RAG, Agentic Workflows (tool-use, orchestration), LLM Optimization, Prompt Engineering, Fine-tuning, LangChain, OpenAI & Anthropic APIs, Hugging Face, YOLOv8, CNN, TensorFlow, PyTorch

Full Stack: FastAPI, Next.js, React (TypeScript), Node.js, Express, Django, Flask, PostgreSQL, Supabase, SQLAlchemy, Alembic, Tailwind CSS, Stripe

Infrastructure: Docker, AWS, Azure, GitHub Actions, Vercel, Netlify, CI/CD, MLflow, Async architectures, REST API design

SELECTED PROJECTS

Wrively [Live | GitHub] – AI-powered writing assistant built with Next.js, OpenAI APIs, and Supabase. Real-time collaboration with intelligent suggestions.

BlueDrumAI [Live | GitHub] – AI-powered music and audio generation platform using deep learning and generative models.

TalPred AI [GitHub] – Production-grade equity alpha system with automated daily predictions, paper trading, and monitoring. Built with XGBoost, PostgreSQL, Redis, MLflow, and React.

EDUCATION

B.Tech in Computer Science & Engineering

2019 – 2023

Sagar Institute of Technology & Management, Barabanki
