

Mohd Talib

Senior Full Stack AI Engineer · Tech Lead

mohammad.talib319@gmail.com · +91 7408 185 999 · [Portfolio](#) · [GitHub](#) · [LinkedIn](#)

Based in India · Open to remote and relocation (USA · EU · UK · Gulf).

Tech Lead and Senior Full Stack AI Engineer with **5+ years shipping production AI systems 0-to-1**, usually in weeks rather than quarters. Currently Tech Lead at **TheAgentic AI** (Applied AI Research, California), shipping production AI platforms 0-to-1 across compliance, healthcare, ad-tech, and enterprise peer-support, and contributing to **CortexON**, its open-source AI agent (455 GitHub stars). Built Dumroo 2.0 from scratch in 4 weeks (US K-12 deployment, promoted to Senior in 6 months); led a **60+ engineer global team at Omdena** across 15+ countries. Focus: agentic AI and RAG systems that are auditable and cost-efficient; recent work delivered **2x insight accuracy and 50% lower inference cost**. Open-source author of **OpenFishh** (Apache 2.0).

EXPERIENCE

Tech Lead · Senior Full Stack AI Engineer

Nov 2025 - Present

TheAgentic AI · Applied AI Research, California · Remote

Forward-deployed tech lead building production AI platforms **0-to-1 in 2 to 4 weeks** with a small team, owning client discovery, architecture, AI systems, and end-to-end delivery.

- **CortexON (open source)**. Contributed to TheAgentic's open-source generalized AI agent for everyday task automation: **455 GitHub stars**.
- **Enterprise peer-support platform**. Architected a multi-tenant, privacy-first platform matching support seekers to mentors from voice stories. Built a safety-gated voice-intake pipeline (transcription, moderation + crisis classifier with human-in-the-loop, structured LLM extraction, multi-vector embeddings) feeding a **learned-to-rank matching engine** (pgvector ANN + LightGBM lambdarank that self-retrains from feedback at near-zero inference cost). FastAPI, Postgres/pgvector, async workers, Kubernetes. Enterprise and university pilots in 2026.
- **Reg-tech platform**. Replaced black-box RAG with **deterministic SQL + LLM orchestration**, making compliance workflows auditable and grounding every response in traceable CFR/FDA data.
- **Health-tech platform**. Built an async vision + LLM platform automating metabolic insight generation from medical images through a scalable multi-tenant architecture.
- **Ad-tech platform**. Improved AI image and video generation quality and delivery workflows for a production creative-generation platform.
- **Fundraising-ops platform**. Shipped new features and refactored the codebase of an AI fundraising operating system used by founders across Google for Startups and NVIDIA Inception cohorts.

Senior Full Stack AI Engineer · Tech Lead

Mar 2025 - Nov 2025

Dumroo.ai · AI EdTech, New Jersey · Remote · **Promoted to Senior in 6 months** (from Full Stack AI Engineer)

- **Built Dumroo 2.0 from scratch in 4 weeks**: an AI-driven learning and assessment platform now in production across US K-12 schools. Next.js · TypeScript · Supabase · Vercel · GitHub Actions.
- Designed RAG pipelines and agentic AI workflows powering personalized learning engines. **2x insight accuracy and 50% lower inference cost** via prompt optimization, caching layers, and model routing.
- Automated school onboarding for **10x faster setup**. Drove inbound interest from 10+ school districts; onboarded 3+ as paying customers.
- Owned engineering org end-to-end: hired engineers, ran sprint planning and interviews, coordinated directly with US school administrators. Refactored backend for throughput and caching efficiency.
- Integrated Stripe billing with role-based access; deployed CI/CD across Vercel and Netlify via GitHub Actions.

Head of AI & Engineering

Apr 2024 - Feb 2025

CodeSpaze · Software, Web & AI Development Services · Remote

Returned to CodeSpaze to lead AI & Engineering after starting here as a Software Engineer in 2021.

- Led a **20-member cross-functional team** spanning AI engineers, web developers, designers, content, HR, and marketing.
- Oversaw AI, ML, web, and internship programs under the CodeSpaze initiative. Drove **10x growth in brand reach: 10,000+ applications in 2 months**.
- Built and deployed full-stack AI projects and internal automation tools. Ran training sessions and mentored interns in Python, Data Science, and Web Development.
- Coordinated between technical and creative teams to ensure consistent project delivery and growth.

Software Engineer & Data Analyst

Jul 2023 - Apr 2024

Techpile Technology Pvt. Ltd. · Lucknow, India · On-site · **Best Performer: Software Developer (2023)**

- Built .NET APIs, SQL dashboards, and data pipelines for internal analytics and operational tracking. Automated data validation and preprocessing across operational datasets.

Machine Learning Engineer to Data Engineering Lead

Mar 2023 - Jul 2023

Omdena · Global AI for Social Good, New York · Remote

- Led 60+ AI engineers across 15+ countries as Data Engineering Lead on a fixed-scope Omdena project. Built YOLOv8 + PyTorch pipelines on 100K+ images and delivered the system to the Nigerian government on project completion.

Software Engineer

Jul 2021 - Feb 2023

CodeSpaze · Software, Web & AI Development Services · Remote

- Shipped 8+ client applications across web, AI, and automation engagements, owning frontend and backend features end-to-end on 2 to 3 week delivery cycles.
- Built reusable component libraries and internal tooling that cut project setup and delivery time by ~30%, and contributed to the early AI/ML prototypes that seeded the company's AI service line.

SELECTED PROJECTS

OpenFishh [Apache 2.0](#) · [OSS](#) [17 stars](#) · [3 forks](#) [openfishhh.com](#) [github.com/MohdTaLib0/OpenFishh](#)

Open-source **agent infrastructure platform** built around the three hardest problems in production agents: **agent memory** (persistent, provenance-tracked), **agent reliability** (verification, confidence scoring, safe fallbacks), and **agent evaluation** (knowing when an agent is actually good). The OSS counterpart to HumanizingLabs, Apache 2.0 licensed for ecosystem adoption.

Python · FastAPI · PostgreSQL · pgvector · OpenAI · Anthropic · LangChain · Multi-Agent Orchestration

HumanizingLabs [humanizing-labs.vercel.app](#)

A living digital society of **1,200 AI agents across 31 knowledge domains**. Reads the internet continuously, maintains persistent belief memory with full provenance chains, runs structured debates on contested claims, and produces auditable intelligence reports on demand. Every belief is typed, sourced, confidence-decomposed, and lifecycle-governed.

Python · Multi-Agent AI · OpenAI · Anthropic · PostgreSQL · FastAPI · Redis · RAG · LLM Orchestration

Wrively [wrively.com](#) [github](#)

AI writing platform that learns your voice and writes from it. Builds a voice profile once, then drafts topic-to-published-post in under 3 minutes. Includes draft orchestration and one-click publish to multiple channels.

Next.js · TypeScript · OpenAI · Supabase

BlueDrum AI [bluedrumai.com](#) [beta](#) [github](#)

Legal evidence organization platform. Collects chats, documents, and financial records into structured case files that lawyers can actually use. AI-assisted classification, entity extraction, and timeline reconstruction.

React · FastAPI · AI/ML · PostgreSQL

TalPred AI [github](#)

Production-grade equity alpha system with automated daily cross-sectional predictions, paper trading, monitoring dashboard, and calibration tracking. Designed with proper backtesting discipline and signal decay analysis.

XGBoost · PostgreSQL · Redis · MLflow · React

SKILLS & TOOLS

AI Systems	Agent Orchestration, Agent Memory, Multi-Agent Systems, AI Reliability, Tool Calling, RAG, LLM Evaluation, Provenance & Observability, Fine-tuning, Prompt Engineering, LangChain, OpenAI / Anthropic / Gemini APIs, Vector DBs (pgvector), Vision-LLM
Full-Stack Engineering	TypeScript, Python, Next.js, React, FastAPI, Node.js, Express, Django, Flask, Tailwind CSS, React Native, .NET
Data & ML	PostgreSQL, pgvector, Supabase, Neon, Redis, MongoDB, MySQL, Firebase, SQLAlchemy, Alembic, MLflow, PyTorch, TensorFlow, scikit-learn, XGBoost, Computer Vision (YOLOv8, CNN)
Infrastructure & DevOps	Docker, AWS, Azure, Vercel, Netlify, Render, GitHub Actions, CI/CD, async architectures, REST API design, observability, runbook documentation
Engineering Leadership	Hiring & interviewing, sprint planning, knowledge transfers, US client coordination, mentoring, code review, technical writing, 0-to-1 product delivery

EDUCATION

B.Tech, Computer Science & Engineering

2019 - 2023

Sagar Institute of Technology & Management, Barabanki, India

SELECTED COURSEWORK & CERTIFICATIONS

Deep Learning Specialization

DeepLearning.AI (Andrew Ng)

Generative AI with Large Language Models

DeepLearning.AI and AWS

Prompt Engineering for Developers

DeepLearning.AI

Machine Learning

Stanford University (Coursera)

LangChain for LLM Application Development

DeepLearning.AI

MLOps Specialization

DeepLearning.AI

RECOGNITION & AWARDS

- 2025 **Fastest promotion to Senior Engineer** · at Dumroo.ai, six months from Full Stack AI Engineer to Senior
- 2025 **Apache 2.0 open-source author** · published OpenFishh (17 stars, 3 forks)
- 2023 **Top 10, Data Science Hackathon** · at Innomatics Research Labs
- 2023 **Best Performer, Software Developer** · at Techpile Technology
- 2023 **Letters of Recommendation** · from CodeClause and The Sparks Foundation
